MANISHA CHAND

San Francisco, CA | +1 (618) 917-8380 | chandmanisha00@gmail.com | GitHub | LinkedIn | Portfolio

SKILLS

Languages: TypeScript, JavaScript, Python, Java, C, C++, MySQL, Bash | **Frontend:** Vue 3, Quasar, Pinia, React, Vite
Backend & Data: Node.js, Express, Prisma, PostgreSQL, Elasticsearch, SQLite, Django
Infrastructure: Docker, Git, GitHub Actions, Azure, AWS, Linux
AI/ML: vLLM, kernel, inference, LangChain, PyTorch, multi-agent orchestration, RAG, token budgeting, LoRA fine-tuning (PEFT), Claude Code, pi, herdr, enterprise automations with LLM and cron-scheduled tasks
Microsoft: Power Apps, Power Automate, Dataverse, SharePoint | **Spoken Languages:** English, Nepali, Hindi (fluent)

EXPERIENCE

Member of Technical Staff — Reichman Jorgensen Lehman & Feldberg LLP Jun 2025 – Aug 2026
IP commercial litigation firm; won a $525M patent verdict against Amazon Web Services (2024).

- Built agentic pipelines to retrieve and analyze judicial transcripts and opinions, each several thousand pages long.
- Generalized a transcript PDF parser with markers and accumulators to aggregate key events in transcript history.
- Deployed the first internal Azure server instance for the firm. Communicated resource requirements with IT, COO, and the technical team.
- Developed a Vue and Quasar frontend stack.
- Architected an auth system with IT for all internal applications.
- Met with attorneys weekly to discuss needs and use cases, adjusting strategy to meet demand.

OSS Contributor 2026
Tapestry — The AI Alliance

- Built model-update validation and checkpoint fingerprint checks for consortium training.
- Fixed contribution build targets and CI regression check.

TorchLean

- Fixed the α,β-CROWN leaf exporter dropping supplied input-property roots; repaired CITATION.cff for CFF 1.2.0 validation.

Software Developer & Research Intern — People's Solar Energy Fund Jan 2026 – May 2026
Coalition of 39 environmental and social-justice organizations helping under-resourced communities build community-owned solar.

- Gathered internal data on networking and built a common tool for member orgs to find mutual support within the PSEF network.
- Completed research on the philosophy of commoning and produced tangible technical pathways to support PSEF's goals.
- Created a DevOps path for PSEF to enhance their digital network and governance strategies.

Member — Autonome Research Labs 2026
Research group working in the interest of enabling self-governance.

- Coordinated limited compute infrastructure across 3 continents for materials and biosciences competitions and experiments.
- Built Hephaestus, a CAD agent harness for laser cutting, 3D printing, and CNC.

Programming Tutor & Grader — City College of San Francisco 2024

- Supported ~40 students in introductory Python and Java one-on-one; graded assignments on correctness, structure, and edge cases.

PROJECTS

FourCastNet 3 Himalayan Fine-Tuning | *Python, PEFT/LoRA, multi-GPU*

- Developing a regional adaptation pipeline for FourCastNet 3 targeting temperature and wind forecasts over Nepal and the Himalayas. Coordinating experiments on two DGX Spark systems, with ERA5 data preparation, elevation-aware bias correction, and evaluation against frozen-model baselines.

CodexMicro Driver | *C, Linux, Kernel Module*

- Developed a virtual device driver in C that simulates the OpenAI Codex Micro agent-control macropad, enabling interaction with an emulated device or open-source physical implementations.

Basic File System | *C, Linux*

- Lead programmer for free-space management and the directory layer of a FAT-based file system built by a five-person team: block allocation/release via chain splicing, path resolution, directory persistence, and the buffered I/O layer.

EDUCATION

San Francisco State University — B.S. Computer Science | GPA: 3.57 December 2026
Coursework: Deep Learning, Natural Language Technologies, Artificial Intelligence, Data Structures & Algorithms, Analysis of Algorithms, Operating Systems, Computer Architecture & Assembly, Software Engineering, Intro to Database Systems, Physics (Mechanics & Electrodynamics), Calculus, Linear Algebra, Discrete Mathematics, Probability & Statistics, Numerical Analysis
